

Talbot Recovery's Professionals Program has earned a national reputation for the comprehensive treatment of addiction (alcoholism, other drug use disorders and other addictive disorders) and its attendant related medical, psychological, psychiatric, spiritual and work-related problems. Over our 35 year history, more than six thousand professionals from all 50 states, Canada and Europe have come to Talbot Recovery for treatment. Most other impaired professionals programs were designed using the principles developed by Talbot Recovery. No one has more experience in treating professional patients.

It is our goal to treat a wide range of professionals who need help with addiction recovery so that they may return to their careers in the future.

Our Impaired Professionals Program treats:

- Physicians in all specialties
- Physician Assistants
- Nurses
- Dentists
- Veterinarians
- Pharmacists
- Therapists
- Psychologists
- Pilots
- Attorneys
- Business Executives

Please call our Intake Department for more information.

## Impaired Professionals Program

*A place of new beginnings*

## Impaired Professionals Program

*Over 35 years of  
Treating Professionals*

### Can I Practice My Profession?

Talbott's goal is to assist our patients in returning to work in their chosen profession providing it is safe for the patient and the public. Using the vast knowledge acquired by years of treating professionals, key members of each patient's treatment team offer expertise in licensure and employment issues. The existing relationships we have with each state board and professional health program allow patients to have a smooth transition back to the workplace upon completion of the Impaired Professionals Program.

### What Happens After Treatment?

Each patient leaves Talbott's Impaired Professionals Program with a comprehensive personalized monitoring or aftercare plan. Input is provided by the Talbott treatment team, state licensing boards, profession-specific advocacy programs, employers, referral sources and the individual patient. Monitoring includes individual and/or family or couples counseling, group therapy, profession specific groups and urine drug screens. Patients find the structure and accountability helpful in early sobriety.

### Why Choose Talbott's Program?

Talbott is the original founder of Healthcare Professionals Treatment Programs. Due to our 35 year history, we are extremely skillful in treating this population's addiction issues. Healthcare Professionals make up 40-50% of our patient population. In the unique clinical setting of our Professionals Program, patients' interaction with peers provides support and accountability.

### Treatment Elements

The Talbott Recovery offers an array of services and levels of care. Each level of care addresses the needs of our patients during different times in the Impaired Professionals Program. We stage the intensity of treatment based upon the levels described by the American Society of Addiction Medicine Patient Placement Criteria, Version II, Revised.

## Talbott Recovery

*A Full Evaluation  
by an Assessment Team*

### 96-Hour Assessment

The Talbott program pioneered the 96-Hour Assessment for the comprehensive addiction evaluation of professionals. We regularly obtain requests for 96-Hour Evaluations from Professional Wellness Programs, state licensing authorities, hospitals or state bars, as well as family and concerned friends. When clinically indicated, a 96-Hour Assessment provides a full multidisciplinary evaluation of an individual. The core of the multidisciplinary assessment team includes:

- Attending Physician
- Psychiatrist
- Clinical Psychologist
- Internal Medicine Specialist
- Addiction Medicine Specialist
- Assessment Coordinator

The team may also include a pain specialist, a neurologist, a spiritual counselor, a behavioral medicine specialist or a sexual boundaries specialist as needed. When additional areas are evaluated, the 96-Hour Assessment may extend past the usual four days.

### Detoxification and Stabilization

Inpatient stabilization is available for patients requiring a more complicated detoxification and/or behavioral containment to interrupt the downhill spiral of their addiction. At the time of admission, patients requiring Level IV care are admitted to our sister facility, Anchor Hospital, which sits on the same campus as Talbott Recovery. Level IV care is under the direct care of a physician who specializes in addiction treatment.

### Partial Hospitalization Program

Following admission or transfer from detox and stabilization, each patient in the Impaired Professionals Program undergoes a thorough evaluation if he/she has not obtained an evaluation previously. The evaluation assesses the patient's physical, psychiatric, psychological, social, spiritual, and family needs to determine the most appropriate level of care.

## Impaired Professionals Program

*Committed to  
Long-Term Recovery*

### Intensive Outpatient Program (IOP)

After completing the partial hospitalization phase of the Professionals Program, patients move to the Mirror Image phase of treatment. Extended Mirror Image may be recommended for patients when indicated.

### Mirror Image

Mirror Image is an addiction treatment innovation created and first implemented by Talbott Recovery founder, Dr. Douglas Talbott. Five mornings a week, Mirror Image patients go to other treatment facilities in the Atlanta area and work with newly admitted alcoholics and addicts. The purpose is to assist patients to overcome the myopia that often accompanies the disease of addiction - patients can see the affects of the disease of addiction in others but are unable to see those same affects in themselves.

### Continuing Care

Talbott Recovery is committed to helping our patients and their families build a long term, self-sustaining recovery. Talbott Recovery continuing care process assists patients and families to develop a program of recovery and a support system that will provide a solid foundation to achieve that goal after they leave our facility.

### Return Visit

The leadership at Talbott Recovery, working together with former patients, developed the Return Visit program. Alumni speak of the significant number of important new friendships they make with other patients while at Talbott Recovery. They also speak of the confidence and trust they developed. Mostly, they speak of how they want to "reconnect" with friends on a regular basis. Responding to this feedback, we developed our Return Visit program, which has become important and well-attended. Patients include Return Visits as a component of their aftercare.

## **Professionals Program Information**

### **Professionals Program Description:**

Talbott Recovery Campus's (TRC) Professionals Program has a national reputation known for the comprehensive treatment of addiction (alcoholism, other drug use disorders and other addictive disorders) and its attendant related medical, psychological, psychiatric, spiritual and work-related problems. Over our thirty five year history more than six thousand professionals from all 50 states, Canada and Europe have come to TRC for treatment. Most other professionals programs were designed using the principles developed by TRC. No one has more experience in treating professional patients.

### **Who we treat:**

TRC accepts patients with a dual-diagnosis, such as addiction with a concomitant depression, anxiety, unresolved grief, personality problems, etc. All of our patients have a chemical abuse problem, but we address the whole patient in his/her disease. We screen the health status of all potential patients to make sure we are the proper facility for care. This usually involves a review of any medical history and records by a member of the medical staff at TRC, and an intake screening assessment with our intake department.

### **Insurance:**

Please call the TRC Intake Department (800.445.4232) and speak with one of our specialists who will assist you to get the best utilization of any available insurance benefits.

### **Levels of Care:**

We stage the intensity of treatment based upon the levels described by the American Society of Addiction Medicine [Patient Placement Criteria](#), Version II, Revised.

### **Detoxification & Stabilization**

Inpatient stabilization is available for patients requiring a more complicated detoxification and/or behavioral containment to interrupt the downhill spiral of his/her addiction.

### Partial Hospitalization Program (PHP with boarding)

Following admission or transfer from detox and stabilization, each patient undergoes a thorough evaluation if he/she has not obtained an evaluation previously. The evaluation assesses the patient's physical, psychiatric, psychological, social, spiritual, and family needs to determine the most appropriate level of care.

### Intensive Outpatient Program (IOP with boarding)

After completing the partial hospitalization phase of treatment, patients are transitioned to TRC's Mirror Image phase (see Treatment Elements). Extended Mirror Image may be recommended for patients when indicated.

### **Length of Stay at TRC**

A patient's length of stay will be determined by the patient's treatment requirements and the patient's progress through treatment. The average length of stay in the Professionals Program is 90 days.

### **Continuity of Care:**

Talbott Recovery Campus (TRC) offers an array of services and levels of care. Each level of care addresses the needs of our patients during different times in their treatment. We stage the intensity of treatment based upon the levels described by the American Society of Addiction Medicine [Patient Placement Criteria](#), Version II, Revised.

### 96-Hour Assessment

The Talbott program pioneered the 96-Hour Assessment for the comprehensive life evaluation of professionals. We regularly obtain requests for 96-Hour Evaluations from Professionals Wellness Programs, state licensing authorities, hospitals or state bars, as well as family and concerned friends. When clinically indicated, a 96 Hour Assessment provides a full multidisciplinary evaluation of an individual. The core of the multi-disciplinary assessment team includes:

- Attending Physician
- Psychiatrist
- Clinical Psychologist
- Internal Medicine Specialist
- Addiction Medicine Specialist
- Assessment Coordinator

The team may also include a pain specialist, a neurologist, a spiritual counselor, a behavioral medicine specialist or a sexual boundaries specialist as needed. When additional areas are evaluated, the 96-Hour Assessment may extend past the usual four days.

During the 96-Hour Assessment, the evaluated individual obtains:

- Internal medicine evaluation / physical exam

- Psychiatric evaluation
- One or more addiction medicine evaluations
- Bio-psychosocial self-assessment
- Laboratory work and drug screens
- Comprehensive psychological testing
- Neuropsychological testing, as indicated
- Collateral data collection from multiple external sources including colleagues and supervisors, patients (for health professionals), family and friends.

The results of the evaluation are shared with the individual at the close of the evaluation session, with input from the team. With proper release and permission, results are sent back to the referring agency.

### *Treatment Planning*

During the assessment process, members of TRC's staff (with patient approval) will contact family members, friends, healthcare providers and referents to collect key collateral data for integration into the patient's treatment plan. In our experience, patients (including those presenting with psychiatric co-morbidity) respond better to treatment, medications and recovery when every aspect of their lives has been addressed in the development of their treatment plan.

Upon completion of a patient's assessment, the treatment team, led by the attending physician, develops an individual treatment plan for each patient and meets regularly to review each patient's progress and to update treatment goals. The clinical case manager works closely with each patient, Family Counselor and the family to ensure the treatment plan is meeting the patient's changing needs. Soon after treatment begins, the patient's continuing care coordinator will begin the process of identifying a patient's discharge needs.

### *Treatment Modalities*

Group therapy is the cornerstone of change in all of our programs; we believe recovery cannot occur alone. The Adult Program utilizes many of the following therapeutic techniques:

- Group therapy
- Medication management of mood disorders
- Individual therapy
- Procedural learning on how to use the 12-Steps
- Psychoeducation group
- Impaired professionals issues group
- Profession-specific groups for medical doctors, dentists, nurses, pharmacists, attorneys and pilots
- Life skills
- Spirituality group
- Family therapy

- Family Program
- 12-Step recovery meetings on campus
- Relapse prevention
- Gender issues group
- Sexual Issues (Male / Female)
- Grief Group
- EMDR (Eye movement desensitization and reprocessing) for trauma issues
- Meditation and mindfulness training

### *Family Program*

The Family Services Department at TRC provides patients and families support and education on the disease of addiction, cross addiction and the impact on the family. The Family Program is designed to assess the family's needs, educate about chemical dependence and offers ongoing family support during and/or after the patient's treatment. The family program is the first step many addicted families make towards healing. Once a patient is admitted to TRC, a family counselor is assigned to respond to any questions or concerns. That family therapist works both at a distance and close up with our families when they attend the family program.

The family program consists of approximately five family sessions and a family workshop during treatment. The family workshop is a four-day educational and supportive experience. The workshop provides education on the disease of addiction and cross addiction and offers an opportunity to address questions and concerns.

### *Mirror Image*

Mirror Image is an addiction treatment innovation created and first implemented by TRC founder, Dr. Douglas Talbott. Mornings, three days a week TRC Mirror Image patients go to other treatment facilities in the Atlanta area and work with newly admitted alcoholics and addicts at that facility. The purpose is to assist TRC patients to overcome the myopia that often accompanies the disease of addiction - patients can see the affects of the disease of addiction in others but are unable to see those same affects in themselves. Patients consistently report that their experience in Mirror Image has a profound affect on their recoveries. Mirror Image patients return to TRC for afternoon groups and appointments with physicians and clinicians.

### *Continuing Care*

Talbott Recovery Campus is committed to helping our patients and their families build a long term, self-sustaining recovery. TRC's continuing care process assists patients and families develop a program of recovery and a support system that will provide a solid foundation to achieve that goal after they leave our facility.

At Talbott, we believe that continuing care actually begins prior to the patient arriving for treatment. Whoever refers a particular patient to TRC becomes the starting point for communication with our treatment team and continuing care coordinator. This begins a process of communication that our coordinators build on throughout the course of

treatment. Each patient is assigned a continuing care coordinator that will work with them throughout the treatment course to:

1. Serve as the referent liaison with our referral sources and the clinical treatment team
2. Gather collateral information and provide written and verbal updates to referents
3. Assist the patient with any work, licensure or legal issues
4. Participate in the multi-disciplinary treatment team to assess patient's progress
5. Identify unresolved treatment issues to be included in discharge planning
6. Plan Extended Therapeutic Leaves (ETL) for the patients prior to discharge
7. Establish a clinical team to assist with patient's long term recovery post-discharge

### *Return Visit*

Almost fifteen years ago, the leadership at Talbott Recovery Campus, working together with former patients, developed the return visit program. Alumni spoke of the significant number of important new friendships they had made with other patients while at TRC. These alumni spoke of the confidence and trust they had developed with TRC staff. And mostly, they spoke of how they wanted to "reconnect" with friends on a regular basis. Responding to this feedback, TRC leadership developed our Return Visit program. Since then, Return Visit has become an important and well-attended component of the programs offered by Talbott Recovery Campus.

Return Visit is:

- A time to come back to TRC to help "recharge recovery batteries"
- A time to meet and "catch up with" old roommates and "domemates"
- A time to "reconnect" with TRC staff who have been important to the patient and to his/her recovery
- A time to remember and recommit to the foundation for recovery they began to build for themselves while in treatment
- A time to offer hope and encouragement and support to current TRC patients

Patients are encouraged to plan their recovery around revisits to the TRC campus. We have learned that the patients who take the time to return to us have a markedly increased recovery rate. Addiction is a disease that we forget we have. The recovery visits remind us to tend to ourselves and our recovery program.

### **What To Bring To Treatment**

Pharmacy plan information

Alarm clock

Toiletries w/no alcohol (including colognes)

Calling card/pre-paid for long distance

Photos of friends & family\*\*

Favorite pillow\*\*

Personal CD player/radio w/headphones (not for use on campus) \*\*

Workout clothes\*\*

Musical instruments\*\*

PDA's (not smart phones)\*\*

Sports equipment (golf clubs, tennis rackets, etc)\*\*  
Casual clothing  
Bathing suit (women - one piece only)\*\*  
Art supplies\*\*  
Writing supplies (journals, stationary, stamps)\*\*  
Reading materials\*\*  
Patients are encouraged to have a car (after receiving staff approval)

\*\*Optional

### **What Not To Bring To Treatment**

Cell phone  
Weapons of any kind  
Non-prescribed medications (including samples)  
Personal computers or equipment  
Musical instrument amplifiers  
Pets  
Pornographic books & magazines, including Maxim  
DVD/VCR players  
Video games  
Alcohol/drugs  
Excessive jewelry/cash/credit cards  
Inappropriate clothing (tank/sleeveless tops, navel-revealing, references to drugs/alcohol, skin-tight, low-riding)

### **Provided By TRC In Each Apartment**

Towels  
Bed linens  
Washer/Dryer  
Telephone (phone card necessary for toll calls)  
Coffee maker  
Microwave  
Internet access (available at treatment building only – not at residences)

### **Frequently Asked Questions:**

1. What age patients would be assigned to the Professionals Program?  
**A:** Generally men and women (26 years & older) struggling with alcohol or chemical addiction/abuse and/or a dual diagnosis. Generally these professionals face specific issues and challenges due to their field of endeavor, expectations from superiors and the public. Professionals who are admitted come from a variety of fields including but not limited to: medical doctors, dentists, nurses, pharmacists, attorneys and pilots. Enrollment in the Impaired Professionals Program is determined by age, professional status and by the individual treatment requirements of each patient.

2. What will be the Average Length of Stay (LOS)?  
**A:** 14 weeks is the average LOS but each patient's actual length of stay will be determined by that patient's treatment requirements and progress through treatment. Inpatient detox and assessment and/or stabilization are not included in that 14 weeks.
3. What is the cost for the Professionals Program?  
**A:** The cost of treatment will vary with each patient's length of stay (LOS) and individual treatment requirements. Please call the TRC Intake Department (800.445.4232) and speak with one of specialists who will help you to determine the costs for your patient.
4. Do you accept insurance?  
**A:** Please call the TRC Intake Department (800.445.4232) and speak with one of specialists who will assist you to get the best utilization of any available insurance benefits.
5. What are the levels of treatment offered?  
**A:** Detoxification & Stabilization, Partial Hospitalization (PHP – Primary Treatment with residential component), Mirror Image, Intensive Outpatient (IOP with residential component), Outpatient and structured living (non-TRC / outside facility) as indicated
6. Do you offer assessments?  
**A:** Yes. Following admission, each patient will undergo a thorough evaluation and will be given a treatment plan. The evaluation will assess the patient's physical, psychological, social, spiritual, and family needs to determine the most appropriate level of care. Some Professionals Help Programs or state licensing authorities may require a 96 Hour Assessment before admission. 96 Hour Assessments are available to these prospective patients. When clinically indicated, a 96 Hour assessment may be recommended to help facilitate decision making by other prospective patients, family members and referents.
7. What types of professionals are appropriate for treatment at TRC?  
**A:** TRC accepts patients with a multiple disease states, such as addiction with a concomitant depression, unresolved grief, personality problems, etc. All of our patients have a chemical abuse problem, but we address the whole patient in their disease. We screen the health status of all potential patients to make sure we are the proper facility for care. This usually involves a review of any medical history and records by a member of the medical staff at TRC, and an intake screening assessment with our Intake Department.
8. What types of Professionals are not appropriate for TRC?  
**A:** Patients with a primary psychiatric diagnosis, who are suicidal, with medical conditions that require inpatient care or patients with behavioral problems such as violence or flight risk.
9. What makes TRC's Professionals Program different from programs at other treatment centers?

**A:**

- Separate program designed to specifically meet the treatment requirements and discharge issues and challenges of professionals
- Treatment designed to address the challenge professional face in their field
- Low patient to staff ratio
- Six full time physicians (all addiction medication specialists including 3 psychiatrists)
- Family Program & Workshop
- Extended Therapeutic Leaves
- Post discharge monitoring and support groups
- Return Visit Program

10. Why would I be successful in your program when I haven't been successful at getting clean and sober at other programs?

**A:**

- *Paul H. Earley, M.D., FASAM – TRC Medical Director*  
“Short term treatment of addiction is like throwing seeds into the ground and hoping they take root. Intermediate care, such as that provided by the Talbott Recovery Campus treats the personality, because the personality is the soil in which recovery is planted. Our job is to tend that soil; to make a patient’s personality fertile so that recovery will grow deep roots and recovery blossoms.”
- *G. Douglas Talbott, M.D. – TRC Founder, Medical Director Emeritus*  
“Professionals should be treated with their peers. The shame and blame professionals experience goes well beyond what other alcoholics experience – we’re supposed to know all the answers. To recover, we need to be in the presence of other professionals.”
- See answer to Question #9

11. Where do patients live?

**A:** Patients live in a structured living environment. Patients live four to an apartment (two bedroom / two bath) located approximately three miles from TRC’s treatment facility.

12. How will I get from the residences to campus every day?

**A:** Until patients have earned staff approval to have a car on campus and for patients who do not have cars, TRC provides for patients’ transportation needs.

13. Who will be involved with my treatment?

**A:** Each patient is assigned an attending physician upon admission to TRC. The physicians at TRC are psychiatrists, internal medicine or addiction medicine specialists. All are certified by the American Society of Addiction Medicine (ASAM). Other members of a patient’s treatment team are:

Case Manager  
Family Counselor  
Spiritual Counselor

Continuing Care Coordinator  
Clinical Associate

14. How often will I see a physician? Therapist (Case Manager)? Family Counselor?

**A:**

- Physician - 1 time / week (minimum)
- Case Manager – Daily
- Family Counselor – 1 time / week

15. What does the day's activities look like? – Click here for Daily Schedule

16. What education, groups and sessions are offered to help me understand the disease of addiction/dual-diagnosis?

**A:** Patients and their families participate in psychoeducational and psychotherapeutic groups designed to help them explore addiction and dual disorders as well as the impact this disease can have on the family.

Treatment Modalities include:

- Group therapy
- Medication management (of mood disorders?)
- Individual therapy
- Procedural learning on how to use the 12-Steps
- Psychoeducation group
- Impaired professionals issues group
- Profession-specific groups for medical doctors, dentists), nurses, pharmacists, attorneys and pilots
- Life skills
- Spirituality group
- Family therapy
- Family Program
- 12-Step recovery meetings on campus
- Relapse prevention
- Gender issues group
- Sexual Issues (Male / Female)
- Grief Group
- EMDR (Eye movement desensitization and reprocessing) for trauma issues
- Meditation and mindfulness training

17. What will I do in the evenings?

**A:** Evenings are times when patients:

- Attend 12 Step Meetings (on and off campus)
- Participate in Community Meetings (at the residences)
- Attend alumni groups (on campus)

- Work on program assignments
- Continue to work on socialization skills
- Read, relax, watch television or listen to music

18. What will my weekends look like?

**A:** On weekends, patients will attend a group at TRC. They will also be required to attend a 12 step meeting. TRC staff will provide recreational activities and patients will have time to take care of personal needs: grocery, pharmacy, free time, treatment assignments, etc.

19. Who will be providing my meals?

**A:** TRC's founder, Dr. Douglas Talbott's treatment philosophy was that patients must learn to be responsible for their own lives and for their sobriety. As soon as patients are stable, they are moved to the patient residences where they cook their own meals (along with their roommates) in each apartment. All apartments are equipped with required cooking equipment, dishwashers and washer / dryers.

20. Will I be interacting with the opposite sex?

**A:** Yes, with staff supervision only

21. May I bring a car?

**A:** Once patients have completed detox, stabilization and have earned staff approval, they are encouraged to have a car on campus if possible. Patients are only allowed to utilize their automobile in the company of two other staff qualified patients.

22. May I bring a Cellphone?

**A:** No. Patients in the Impaired Professionals Program are not allowed to have a Cellphone during treatment.

23. Will I be able to communicate with my friends and family? How often?

**A:** Patients can write letters or email friends based on the recommendations of their treatment team. One goal of treatment is keep the patient focused on their treatment and new recovery. Too much outside contact can defocus the patient.

24. How will my family be involved with my treatment?

**A:** Family is a very important part of the patient's recovery. During treatment, each patient / family will be assigned a family counselor who will do a detailed assessment with the patient and also with the family members to determine each family's unique needs. Then, throughout treatment, the family counselor will have weekly family counseling sessions, which can be done on the phone or in person, if the family lives locally. We also have a family support group each Tuesday evening from 6:15-7:30 for any family members who would like to attend. The patient's physician will be in contact with the family as needed to discuss course of treatment, progress and aftercare recommendations.

### Sample Family Program Schedule

Time	Monday	Tuesday	Wednesday	Thursday
8:30 a.m. 9:00 a.m.	Registration Welcome-Orientation	8:45 a.m. Lecture	8:45 a.m. Lecture	8:45 a.m. Lecture
9:45 a.m.	Lecture			
10:00 a.m.		Lecture	Lecture	Lecture
11:30 a.m.	Group	Group	Group	Group
12:30 p.m.	Lunch	Lunch	Lunch	Lunch
1:30 p.m.	Lecture	Lecture	Lecture	Lecture
3:00 p.m.	Group	Group	Group	Group
4:00 p.m.		4:30-5:30 p.m. Reception	Free time with patient to include 12-Step meeting	4:00 p.m. Community Meeting/AA
5:00 p.m.	Al-Anon Meeting	6:15 p.m. Group (Spouses/SO)		
6:00 p.m.	Free time with patient	7:45 p.m. Free time with patient	6:00 p.m.	6:30 p.m. Free time with patient
10:30 p.m.	Curfew	Curfew	Curfew	Curfew

25. If I am on medications, how will the medications be dispensed?

**A:** Medications are distributed at TRC for the patient's first week of treatment. After the first week, the patient is responsible for picking up and paying for medications at the pharmacy themselves. Patients are given medications in weekly or monthly doses as determined to be safe by the physician.

26. What happens when I am discharged from treatment?

**A:** The Talbott staff will help each patient develop an appropriate aftercare plan. This may include outpatient therapy, family counseling and structured living (non-TRC / outside facility). Random drug screens may be recommended. All elements are determined by the clinical team in the patient's best interest for recovery.

27. What aftercare or continuing care services are provided?

**A:** For patients residing in the Atlanta area - physician monitoring, Tuesday night peer support group, individual therapy.

28. Will I have to live in a halfway house once discharged from treatment?

**A:** The treatment team will work with the patients and their families to determine what will be the most effective plan for each patient.

29. Will I be allowed to go on Extended Therapeutic Leaves (ETL's)?

**A:** Yes, to set up aftercare, if returning to a home not in the local Atlanta area.

30. Will I be able to participate in Return Visits as well?

**A:** Yes
